Free Heart Screening Clinic

Hosted by The Peyton Walker Foundation
and PinnacleHealth CardioVascular Institute

SUNDAY, NOVEMBER 22, 2015

9:00 a.m.- 4:00 p.m.
Bishop McDevitt High School
1 Crusader Way, Harrisburg, PA

The Heart Screening Clinic is open to students in the Central PA region, 12 to 19 years old, who are not currently under the care of a cardiologist. Echocardiograms will also be offered that day on site, free of charge, for those students who are identified as needing additional testing.

Appointments are on a first come, first served basis. Pre-register is required online at www.peytonwalker.org/events by November 13. For more information, please visit peytonwalker.org or call (717) 697-5511.

The Peyton Walker Foundation was established in honor of Peyton Walker, a 2012 Trinity High School graduate who passed away unexpectedly from sudden cardiac arrest at the young age of 19. The Foundation is offering these routine Heart Screening Clinics at no cost for students as a means of early detection for heart-related issues.

Some facts about Sudden Cardiac Arrest (SCA)

- SCA is the #1 killer of student athletes.
- Every three days, a student dies from SCA.
- Some warning symptoms of SCA include dizziness, fainting, shortness of breath or chest pain.
- The first symptom of SCA is often sudden death.
- One out of every 100 students screened is found to have a previously undetected heart condition.
