

Dear Parents and Guardians,

This summer we successfully launched our new parent portal in Powerschool. Parents are now able to view multiple students under one login account.

We are now pleased to announce student Powerschool logins.

Each Middle and High School student has previously been assigned network credentials. Students are familiar with them as they are used to access Moodle.

To access Powerschool students will add a capital S after their username(student number) and use their Moodle password.

As an example, if the student's Moodle credentials are:

Username: 123456

Password: abcdefg

the student's Powerschool credentials would be:

Username: 123456S

Password: abcdefg

The internet address to access Powerschool for parents and students remains <http://powerschool.pasd.us>

If students do not know their login credentials they can contact the guidance office for help.

Thank you for your continued use and support of Powerschool.

Mark Bucher
